

As many uses as a pocket knife

NiteStar DMI

The NiteStar is a Distance Measuring Instrument (DMI) that accurately measures distances as you drive. It is easy to use and integrates with GIS mapping software. The NiteStar has a multitude of applications:

- > Roadway or railway lengths
- > Cable or pipeline lengths
- > Paint line or guardrail lengths
- > Passing/no passing zones
- > Inventory of signs, guardrails, etc.
- > Pole or sign spacing
- > Truck, bus or postal routes
- > E-911 address mapping
- > Accident reconstruction
- > Material calculation for construction or repair
